

## COCKERILL

SPARE PARTS SUITABLE FOR:

### DIESEL ENGINE TYPE TR240

CMI (Cockerill Mechanical Industries) is an engine builder with its head office in Belgium. CMI stopped production of the TR240 engines for more than 15 years.

With only limited numbers of these engines built, CMI stopped producing new engines which resulted in high prices + long delivery times.

Several clients approached IMSE for a solution to this problem. Therefore IMSE decided to stock key components and consumables suitable for the TR240 in our Antwerp warehouse.

IMSE supplies valves, seats, guides, bearings, nozzles, liners, pistons, cylinder heads and gaskets with a short delivery time at attractive prices.

**“Because quality and knowhow  
are essential”**
